EXPERIENCES

TaniHub, Jakarta — *Associate Principal Frontend Engineer*

JUNE 2022 - PRESENT

- Manage and improve on existing architecture to not just improve developer experience but also have business impact.
  - Migrate CRA projects to Vite for faster development process.
  - Standardize development flow using Trunk Based Development.
  - Standardize code style using existing standards with a little modification, including ESLint, Stylelint, etc.
  - Update npm packages regularly to minimize tech debt possibility.
  - Manage internal npm packages.
  - Create internal CLI tools to speed up development.
- Manage development timeline with shared resources from the product squads.

TaniFund, Jakarta — *Frontend Lead*

JULY 2021 - JUNE 2022

- Lead and manage the frontend engineer team, ex: do one-on-one meetings and regular performance review.
- Conduct interview sessions with new candidates, including Frontend Engineers and Product Managers.
- Conduct biweekly frontend discussions to keep engineers up-to-date with the current state of the Engineering Team.
- Initiate discussion with Product Design Lead to standardize design languages and the possibility of developing the design system.
- Initiate discussion with PMs to improve on the Scrum process.
- Do weekly reports to the Engineering Manager and VP of Engineering.
- Involved in product meetings to prepare for product requirements.

TaniFund, Jakarta — *Senior Frontend Engineer*

JUNE 2020 - JULY 2021

- Develop several Nuxt projects from scratch such as *Kredit UMKM* and *Field Officer Dashboard.*
- Migrate existing projects from Laravel to existing Nuxt architecture, such as the main website and internal dashboard.
- Implement observability of the sites using Sentry.
- Improve code quality with unit tests and integration with Sonarqube.
- Help optimize CI/CD process for faster deployment.
- Help with code review for other frontend engineers.

SKILLS

Have solid fundamentals on `HTML5`, `CSS3`, and `ES6`. Experienced in `Vue` and `React`, its extended framework `Nuxt` and `Next`, and the other supported libraries like ***Pinia / Vuex***, ***Vue Router***, ***Redux / RTK***, ***React Router***, etc.

Design wise, all my works have been ***Responsive Design*** using ***SCSS*** or ***Styled Components / Emotion***. Familiar with design tools like ***Sketch***, ***Zeplin***, ***InVision***, etc.

Also experienced in ***JQuery*** and ***Bootstrap***, if it's still relevant :)

Used other tools in my previous works such as *Sentry*, *Sonarqube*, *Devtools*, *Slack*, *Postman*, *VSCode*, *Lighthouse*, *Gitlab*, *Jira* and many more.

Have a little experience using *Node*, *Jest*, *Docker*, *Jenkins*, *GraphQL*, but haven't got time to dive deeper into these things.

Currently interested in ***T3 stack*** `create-t3-app`, especially in ***Prisma*** and ***tRPC***.

HiApp, Jakarta — *Frontend Engineer*

JANUARY 2019 - JULY 2019

- Develop several React projects such as *Official Account Manager*, *Official Account Internal Application*, and *HiApp Landing Page*.
- Help calculating project requirements based on Scrum principles.
- Help with code review for other frontend engineers.

Bahaso, Jakarta — *Frontend Engineer*

MARCH 2015 - SEPTEMBER 2018

- Develop the main website using Laravel in the first years.
- Develop CMS for the main website using Metronic (Admin Template).
- Develop some internal applications using React and AdminLTE.
- Develop *TOEFL prep* and *IELTS prep* using Vue (including CMS).
- Help with UI/UX design, API design, and content management for the *TOEFL* and *IELTS* team.
- Redesign the main website + migrate to Vue.
- Train and supervise new frontend engineers.

Binus University, Jakarta — *Teaching Assistant*

SEPTEMBER 2011 - SEPTEMBER 2014

- Teach and assist students in practicum sessions.
- Create teaching modules such as teaching material, exams, and projects.
- Grade student's exam, assignments, and projects.
- Provide training for junior assistants or other business units.
- Research and Development known as *TPA* and *RIG*.

Binus University, Jakarta — *Magister Teknik Informatika*

APRIL 2015 - APRIL 2018

Binus University, Jakarta — *Teknik Informatika*

SEPTEMBER 2010 - APRIL 2014

SMAK Kolese Santo Yusup, Malang

AGUSTUS 2007 - AGUSTUS 2010

DJI SAM SOE

FEBRUARY 2019

Frontend Developer of *djisamsoe.id* using *React.*

GRAPHIC DASH

NOVEMBER 2017 - JANUARY 2018

Frontend Developer of *graphicdash.com* using *Laravel.* Also worked on the CMS using *Angle* (Admin Template).
